

CLEAN WITH ME PROJECT

Introduction

Maisha Arts Development is a Non-Profit organization in Arusha, Tanzania that deals with Life and Arts Development. Maisha is a Swahili word for Life. We encourage creativity, individuality, and independence. We create an environment filled with love, patience and kindness.

The aim of the organization is to connect people who want to collaborate with local institutions such as orphanages, schools, hospitals, and community groups through different life and arts projects.

Project

This year we are running a project: "CLEAN WITH ME".

We decided to run this project because as the human population grows and grows, natural resources are being misused and large areas of forest and water channels are being converted to human use. This leads to the environmental pollution and many unnecessary diseases is the outcome.

M.A.D saw this and thought of a way to help the community on how to use their natural resources and be aware of the safety of their environment because their health depends on them.

Programs

A: Education

We believe that education is one of the most important ways of helping different communities to face different kinds of life difficulties and challenges. With this project we will be provide environmental education in various schools and other institutions that we collaborate with. The education program will include personal and environmental hygiene in different areas.

B: Physical Practice

We plan to clean specific areas of the community and place dustbins in different areas of town and villages. Also we plan to renovate and paint different schools and institutions in Arusha.

Requirements

Volunteers

We welcome everybody around the world that would like to collaborate with us in this year's project because we believe that one cannot change the world but together we can make a difference. Please join us to make this happen!

Supplies

Books and all learning materials, paint, clothes, and accessories. All cleaning materials like cleaning soaps, toothpaste, tooth brushes, dusters, dustbins, blackboard erasers, gloves, goggles and any other cleaning materials that will be useful in this project.

How you can help

To make this project happen we need some help. Here are some of the following ways that we think you can help out.

1. Through volunteering with us in our project Clean and Me or other volunteering programs.
2. Through donating project supplies and equipment that will help develop the community to a more healthy and stable environment.
3. Through raising money, to help fund the project.
4. Giving you personal input through your educations and experiences to come up with ideas that will be useful for the communities.

**Our friendly team is here to deal with all of your inquiries as quickly as possible.
And through the following contacts is how we can stay connected with you!**
